

DEPLOYABLE MORGUE

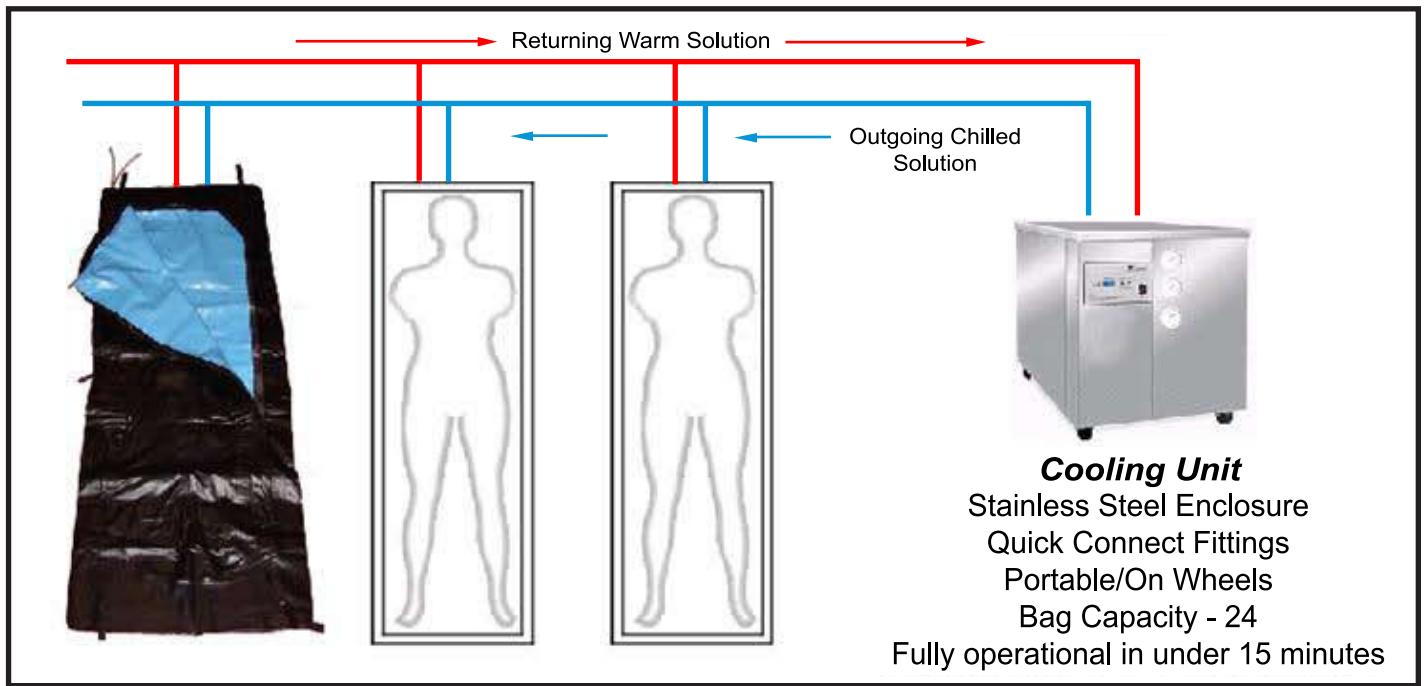

The BLU-MED Deployable Morgue delivers fast and flexible solutions for meeting urgent needs during mass fatality incidents. This package can be rapidly deployed to expand existing morgue space to establish a stand-alone facility in support of an incident site or to isolate contaminated victims. Proper victim processing and post-mortem investigations can occur during large scale incidents by using our patented cooling technology. The BLU-MED Cooling System eliminates the traditional challenge of finding large refrigerated vehicles or buildings.

SYSTEM FEATURES:

- **650 square feet of holding capacity and workspace**
- **Capacity for up to 24 victims**
- **Self-contained electrical power and HVAC**
- **Modular design allows for easy expansion**
- **"Shirt-sleeve" working environment**

DEPLOYABLE MORGUE COOLING SYSTEM

**Portable • Small Footprint •
Low Maintenance • Scalable**

COOLING SYSTEM FEATURES:

- Reusable victim bags with disposable liners reduces logistics and storage requirements
- Multiple sizes - adult, child and infant
- Bags constructed for ease in handling of victims remains
- Odor control technology reduces smells typically associated with morgues
- Proven technology
