SECUR-ID™ Pre/Post Decon Combo Kits

Whether at a HazMat incident scene or outside a hospital, the successful processing and/or decontamination of ambulatory “people in need” depends significantly on the ability to provide clear and concise communication and instructions. Furthermore, the opportunity and liability for an individual’s lost or misplaced property demands a means by which a person’s clothing and valuables can be securely stored and tracked.

The answer...

Greenwich Safety’s SECUR-ID™ Pre/Post Decon Combo Kits.

The SECUR-ID™ Decon Pre/Post Combo Kit comes in three sizes – youth, adult & large adult – containing a “saddlebag” package, with Pre-Decon (red section) and Post-Decon (green section) kits to walk the individual through the entire decontamination process.

The Pre-Decon kit includes:

- Step-by-Step Pictogram Instructions
- Red Modesty Cover
- Two (2) Property Bags (small for valuables and large for clothing & shoes)

After processing and/or going through the decontamination shower, the individual then uses the Post-Decon Kit, which includes:

- Step-by-Step Pictogram Instructions
- Towel(s)
- Green Modesty Cover
- Booties
- Comb

As mentioned above, the opportunity and liability for an individual's lost or misplaced property demands a means by which a person's clothing and valuables can be securely stored and tracked. To address that critical need, the SECUR-ID™ Pre/Post Decon Combo Kit utilizes the patented, SECUR-ID™, tamper-evident technology whereby the person's belongings are sealed in bags with unique identifying serial numbers. The two bags are:

SMALL BAG (for valuables)

- To hold one (1) person's small valuables
- Unique, ID number & bar code on bag and wrist receipt connects individual with their property
- Wrist receipt tears away
- Patented tamper-evident closure provides security
- Step-by-step pictogram instructions
- Inert materials
- 12.5"W x 21"H

LARGE BAG (for clothing & shoes)

- To hold one (1) person's clothes and shoes
- Unique, ID number & bar code on bag and wrist receipt connects individual with their property
- Wrist receipt tears away
- Patented tamper-evident closure provides security
- Step-by-step pictogram instructions
- Inert materials
- 21"W x 28"H

Greenwich Safety's SECUR-ID™ Decon Combo Kit provides a clear, concise and secure means of helping people through incident or hospital processing, while limiting the opportunity for lost possessions.
